1. Latest Press Release and Filings

On August 14, 2020 Verde filed its Q2 2020 Results.
 The Company also hosted a conference call on August 26, 2020 to present the results.

Please see below a weblink to the relevant materials:

- [MD&A](#)
- [Financial Statements](#)
- [Press Release](#)
- [Results Presentation \(Video\)](#)
- [Results Presentation \(PDF File\)](#)

2. Permits¹

2.1. Summary

Verde has 3 different mine pits, each one at a different permitting stage and targeting different volumes, as summarized in the table below:

Mine Pit	Fully Permitted to Produce (tpy)	Mining (tpy)		Environmental (tpy)	
		Granted	Pending	Granted	Pending
1	233,000	233,000	0	233,000	0
2	150,000	150,000	25,000,000	200,000	2,500,000
3	49,800	49,800	2,500,000	49,800	0
Total	432,800	432,800	27,500,000	482,800	2,500,000

Verde is fully permitted to mine 432,800 tpy (i.e. Verde holds both a mining Concession/Permit and Environmental Licenses) and has submitted applications for an additional 2,500,000 tpy still pending approval.

2.2. Last 12 months

Mine Pit	Date	Category	Status	Event
1	August 19, 2020	Environment	Granted	233,000 tpy Operating License
2	March 30, 2020	Environment	Applied	2,500,000 tpy Preliminary and Installation License
2	March 26, 2020	Mining	Approved	25,000,000 tpy Feasibility Study
3	March 25, 2020	Mining	Applied	2,500,000 tpy Mining Concession Application
2	December 23, 2019	Mining	Granted	100,000 tpy Mining Permit
1	September 19, 2019	Environment	Applied	233,000 tpy Operating License
1	July 19, 2019	Mining	Granted	233,000 tpy Mining Concession
3	July 16, 2019	Mining	Granted	49,800 tpy Mining Permit

¹ Please refer to the Glossary on page 6 for technical terms.

3. Sales Growth

The following table shows Verde's sales growth per quarter:

Quarter	Sales Volume (Tonnes)		Growth
	2019	2020	
Q1	1,093	10,170	830%
Q2	23,600	71,183	202%
Q3	62,895	To be announced	-
Q4	32,221	To be announced	-
Total	119,809	81,353	-

Quarter	Revenue (CAD \$'000)		Growth
	2019	2020	
Q1	154	510	230%
Q2	1,329	2,492	87%
Q3	3,055	To be announced	-
Q4	1,491	To be announced	-
Total	6,029	3,002	-

4. Environmental, Social and Governance

- Verde's production process is sustainable, with no water or chemical consumption and no dams or waste generation. Recovery rate is 100%.
- Mined area is mainly composed of degraded pasture, which is being transformed into tropical forest by Verde.
- Verde planted 4,300 trees in 2019 and will plant 5,019 more in 2020.
- Verde was awarded the "Good Environmental Practices Award", promoted by the State System of Environment and Water Resources (SISEMA, in Portuguese) in the category "Best Practice of Mineral Solid Waste Management", 2019.

5. Share Statistics²

The graphs below show Verde's stock value over the past 30 days and average volume statistics over the past 3 months:

TSX: NPK
 Average Volume (3 months) = 24.89k

OTCQB: AMHPF
 Average Volume (3 months) = 8.14k

6. Top Headlines

6.1. Verde's Channel

- [Q2 2020 Results Presentation](#): Watch Verde's latest results presentation.

6.1.2. Farmers Testimonials

- [Mr. Minamihara | Avocado, Coffee](#): "One of the products we use is K Forte and we have noticed a big difference in the plant's appearance. The product is chloride free, so I am very happy with it. K Forte is one of the products that we can use with peace of mind."
- [Mr. Souza | Coffee](#): "We like the product so much that today 100% of our potassium requirement is delivered by K Forte."
- [Mr. Fernandes | Agricultural Products](#): "We applied Silício Forte and the leaves became more robust, harder and firmer, making it more difficult for the diseases to enter. It's a really good product, with great results."
- [Mr. Costa | Coffee](#): "We used K Forte for the first time because it was recommended to us and the product was a godsend. Really good quality. Indeed, if you look at the end product, the quality is excellent. I think it will grow more and more in the market."

6.2. Analyst Coverage

- [Hard Asset Digest](#): John Kaiser was interviewed by Mike Fagan on September, 2020.

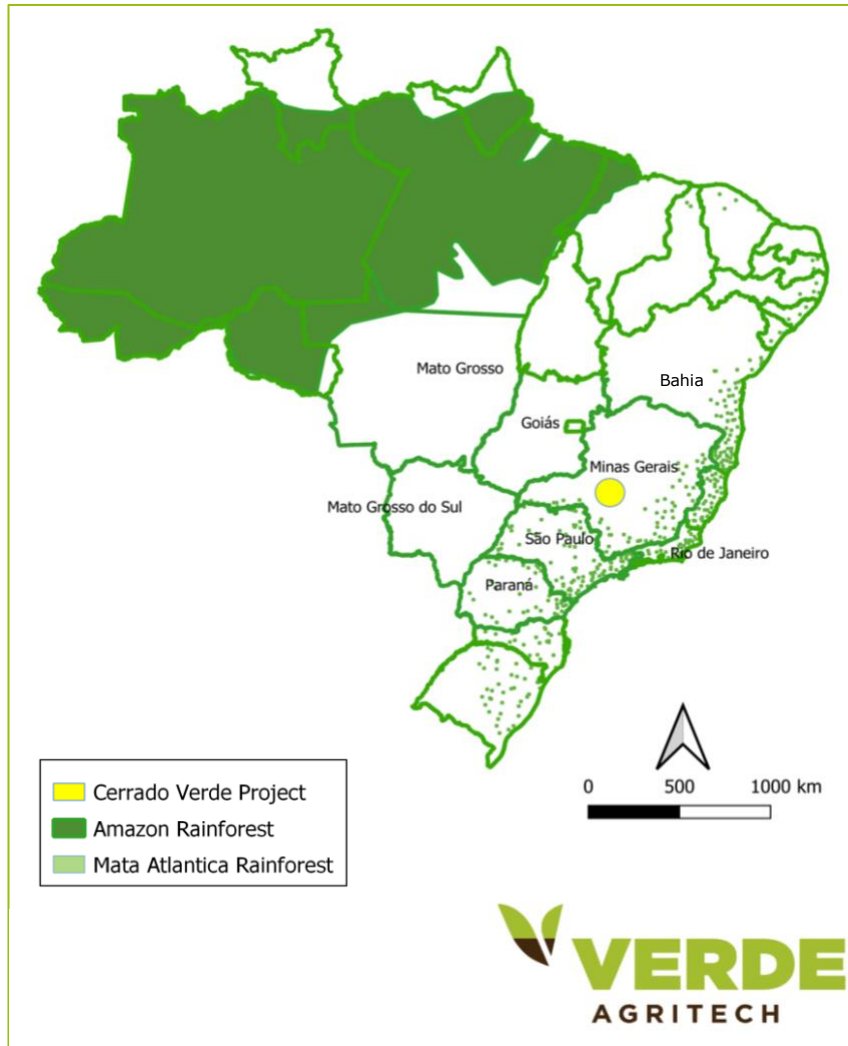

6.3. Relevant Agribusiness News

- [In a World Demanding Change, Impact Investing Takes off](#): According to Forbes, impact investing is experiencing significant growth, driven by strong performance and a desire to change the world for the better in a crisis.
- [Soil microbes could promote better farm outputs](#): In hotter, dryer conditions with climate change, a secret agent for more sustainable agricultural production could lie in harvesting the diverse beneficial soil microbiome in native bushland settings, scientists say. The research highlights the importance of soil biological health and further potential to use organic rather than chemical farm inputs for crop production.

7. Area used for crop production in Brazil³

State	Area (ha)
Mato Grosso	16,611,799
Paraná	10,565,962
São Paulo	8,172,747
Goíás	6,522,432
Mato Grosso do Sul	5,790,276
Minas Gerais	5,596,641
Bahia	4,073,219
Other States	21,913,415
Total area	79,246,491

³ Source: Brazilian Institute of Geography and Statistics, Systematic Survey of Agricultural Production, 2019.

8. How much K Forte® is used in average per crop

- Soybeans: 1 tonne per hectare
- Corn: 1 tonne per hectare
- Cotton: 1.5 tonne per hectare
- Coffee: 3 tonnes per hectare
- Sugarcane: 1.5 tonne per hectare

9. K Forte® Application Calendar

The calendar below shows the agricultural production cycles and the period for application of K Forte® in different crops, according to seasonality:

Crop	Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sep	Oct	Nov	Dec
Soybeans	Harvest				K Forte® Application							
Corn	Harvest				K Forte® Application				Harvest (Second Crop)			
Cotton	Planting (Second Crop)				K Forte® Application				Harvest			
Coffee	Planting - Top Dressing				K Forte® Application				Harvest			
Sugarcane	Harvest (Northeast Region)				K Forte® Application				Harvest (Central-West and South Regions)			
	Planting (18-month cycle)								Planting - Top Dressing			

10. Results Calendar

Results	Due Date
Q3/20	November 16, 2020
Q4/20	March 31, 2021
Q1/21	May 14, 2021
Q2/21	August 13, 2021

15. Glossary

ANM: See "National Mining Agency".

Cerrado Verde Project ("the Project"): Located in Minas Gerais state, Brazil. Potassium-rich deposit owned by Verde, from which the Group is producing solutions for crop nutrition, crop protection, soil improvement, and increased sustainability. The Project has an NI 43-101 Measured and Indicated Mineral Resource Estimate of 1.47 billion tonnes at a grade of 9.2% K₂O, which includes a Measured Mineral Resource of 83 million tonnes with an average grade of 10.1%

K₂O. The Pre-Feasibility Study of the Project evaluated the technical and financial aspects of producing 25 Mtpy of the Product divided in three phases: Phase 1 (0.6 Mtpy); Phase 2 (5 Mtpy) and Phase 3 (25 Mtpy). Cerrado Verde Project has been in production since 2017.

Exploration Authorization Application (“Requerimento de Pesquisa”): Claim for the geological exploration of an area. Interested parties must file an application for exploration authorization with the ANM and state a case for conducting mineral exploration activities. The Exploration Authorization Applications are analyzed in order of filing date. If the party requesting an exploration authorization meets the necessary legal requirements and an exploration authorization has not been previously issued for any part of the area in question, then the ANM will grant the exploration authorization.

Exploration Authorization (“Alvará de Pesquisa”): Once mineral exploration is completed, a final exploration report must be submitted for ANM’s review and approval. If approved, the next step is to file, within one year, all applications for a mining concession with the Ministry of Mines and Energy (MME). The Exploration Authorization guarantees to the owner, be it an individual or a legal entity, the power and duty to carry out mineral research work in the entitled area. It grants the rights to conduct exploration activities for a period from two to four years, which may be renewed for an additional period (and potentially additional renewals on a case-by-case basis). An exploration authorization does not give the holder the right to extract mineral substances. During the research work, extraction will only be allowed in exceptional circumstances, with a specific title issued by the ANM (Mining Permit – “Guia de Utilização”). At the end of the research stage, the holder of the mining right must present a Final Exploration Report with the results obtained from the work.

Environmental Licenses (“Licenças Ambientais”): The environmental licensing process consists of a three-step system, each step is a separate license contingent upon the prior step. In the state of Minas Gerais there is the possibility of licensing phases simultaneously, depending on the size of the project, according to the Normative Resolution 217/2017. The three phases are, as follows:

- **Preliminary License (“Licença Prévia – LP”):** Granted at the planning stage of the project, this license signals the approval of its location, concept and environmental feasibility. It establishes the basic requirements to be met during the subsequent implementation phases. The maximum term for LPs is five years.
- **Installation License (“Licença de Instalação – LI”):** This license authorizes the setup of the works and commencement of construction based on the specifications set forth in the previous license and the approved plans, programs and project designs, including environmental control measures. The maximum term for LIs is six years.
- **Operating License (“Licença de Operação – LO”):** This license authorizes the operation contingent upon compliance with the terms of the LO and the LI, including any environmental control measures and operating conditions. The maximum term for LOs is 10 years.

At the federal level, the environmental licenses are regulated by the Brazilian National Council for the Environment (Conselho Nacional do Meio Ambiente - CONAMA) Resolution No. 237/1997 and by Complementary Law No. 140/2011; at the state level, the environmental license are regulated by the State Environmental Policy Council (Conselho Estadual de Política Ambiental - COPAM).

Feasibility Study (“Plano de Aproveitamento Econômico – PAE”): report filed as part of the Mining Concession Application. It contains quantitative geological and technological studies of the mineral deposit and demonstrate the technical-economic feasibility of a mine.

K Forte® (“the Product”): Multinutrient potassium fertilizer brand marketed in Brazil by the Group.

MME: See “Ministry of Mines and Energy”.

Mine Site: An economic unit comprised of an underground and/or open pit mine, a treatment plant and equipment and other facilities necessary to produce metal concentrates, in existence at a certain location.

Mining Concession Application (“Requerimento de Lavra”): This application must satisfy certain requirements, including the presentation of the mining company’s Feasibility Study (Plano de Aproveitamento Econômico - PAE). While the ANM reviews the application for a mining concession, the applicant retains the exclusive rights to this area. Mine construction and development activity can only begin after the publication of a mining concession issued by the MME and provided that the respective license is also granted pursuant to applicable Brazilian environmental laws.

Mining Concession (“Portaria de Concessão de Lavra”): guarantees to the owner the power and duty to explore the mineral deposit until it is exhausted, without a definite term. The title can only be obtained by mining companies and only after undertaking the authorized exploration through an exploration authorization and subsequent approval of the Final Exploration Report. One of the essential documents for requesting a mining concession is the Feasibility Study, which must demonstrate the technical and economic viability of the project and indicate, among other information, the mining method, the planned scale of production and the mine closure plan.

Mining Permit (“Guia de Utilização”): exceptional mining permit with predetermined expiration date. It is granted by the ANM and allows the mineral extraction in the area before the grant of a Mining Concession, according to the environmental legislation.

Mineral Right (“Direito Minerário”): Authorization to research and/or prospect a tenement. It is granted by the federal government through the ANM or the MME, depending on their respective competencies.

Ministry of Mines and Energy (“Ministério de Minas e Energia – MME”): federal government’s branch responsible for making public policy that covers the geological, mineral and energy resources, hydroelectric, mining and metallurgic energy sectors.

National Mining Agency (“Agência Nacional de Mineração – ANM”): federal agency subordinated to the Ministry of Mines and Energy. It is responsible for the management of mining activities and Brazilian mineral resources. Former National Department of Mineral Production (“Departamento Nacional de Produção Mineral - DNPM”).

Product: Multinutrient potassium fertilizer marketed in Brazil under the brand K Forte® and internationally as Super Greensand®, whose production and sale is the principal activity of the Group. 5

Tonne: A unit of weight. One metric tonne equals 2,204.6 pounds or 1,000 kilograms.

tpy: Tonnes per year.

Super Greensand® (“the Product”): Multinutrient potassium fertilizer brand marketed internationally by the Group.

16. Disclaimer

Use of this newsletter is covered under the following disclaimer, terms and conditions (the “Legal Disclaimer”).

Verde AgriTech (“Verde” or the “Company”) may revise and update this Legal Disclaimer at any time and without notice. You are cautioned to review the Legal Disclaimer periodically.

Important: The material in this newsletter, including, without limitation, all reports, tables, diagrams, maps, photographs, newspaper or journal articles, is provided for personal, non-

commercial, educational and informational purposes only and does not constitute a recommendation or endorsement with respect to Verde. The material is not and should not be construed as an offer of securities in any jurisdiction. The material is based on publicly available information, internally developed data and other sources. Privacy: Any material information or other communication (including questions, comments or suggestions) you transmit to Verde through the Company's website will be considered non-confidential and non-proprietary ("Communications"). In making such transmission, you agree that Verde will have no obligations of any kind with respect to the Communications. Where it is necessary, in order to answer your enquiry, the Communications you have provided may be passed to any Verde office or affiliate. By sending any Communications to us, you are consenting to the personal information contained therein being transferred within Verde and being processed by the Company for these purposes. You are prohibited from posting or transmitting to or from Verde any unlawful, threatening, libelous, defamatory, obscene, pornographic, or other materials

that violate any law. Verde will not be liable for any claims, expenses, losses or damages resulting from the transmission or use of Communications.

Forward-Looking Information: Certain information contained on this document constitutes “forward-looking information” within the meaning of the applicable Canadian securities legislation. All statements, other than statements of historical fact that address activities, events or developments that the Company believes, expects or anticipates will or may occur in the future constitute forward-looking information. Such forward-looking information reflects the current expectations or beliefs of the Company based on information currently available to the Company and includes, among other things, statements relating to the Company’s projects, business and operations. Forward-looking information can be identified by discussions with respect to predictions, expectations, beliefs, plans, projections, objectives, assumptions, future events or performance related to the Company’s projects, business and operations, and often but not always uses phrases such as “expects”, or “does not expect”, “is expected”, “anticipates” or “does not anticipate”, “plans”, “budget”, “scheduled”, “forecasts”, “estimates”, “believes” or “intends” or variations of such phrases and words, or states that certain results, actions, or events “may”, “could”, “would” or “will” be taken to occur or be achieved; such discussions are not historical facts and may be forward-looking information. Forward-looking information is subject to significant risks and uncertainties and other factors that could cause the actual results to differ materially from those discussed in the forward-looking information, and even if such actual results are realized or substantially realized, there can be no assurance that they will have the expected consequences to, or effects on, the Company. For a list of some of the factors that could cause actual results or events to differ materially from current expectations, you are advised to consult Verde’s most recent Annual Information Form under the headings “Forward-Looking Information” and “Risk Factors” and, to the extent applicable, the sections of any other document on this site entitled “Forward-Looking Statements”, “Forward-Looking Information” and/or “Risk Factors”. Any forward-looking information speaks only as of the date on which it is made and, except as may be required by applicable securities laws, the Company disclaims any intent or obligation to update any forward-looking information, whether as a result of new information, future events or results or otherwise. Although the Company believes that the assumptions inherent in the forward-looking information are reasonable, forward-looking information is not a guarantee of future performance and accordingly undue reliance should not be put on such information due to the inherent uncertainty therein.

Jurisdiction: Verde is a British corporation and is governed by the laws of United Kingdom and the securities laws of such other jurisdictions in which it is a reporting issuer, and does not, by virtue of this document or any material contained herein, expressly or impliedly attorn to the laws of any other jurisdiction.
