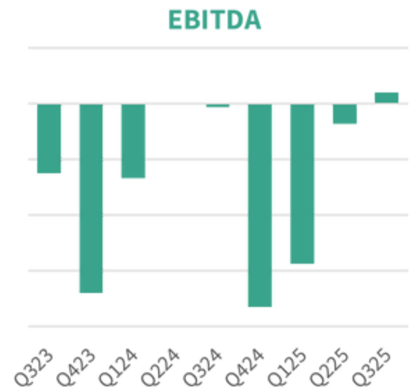
- **Q3 2025 Results Reports Positive EBITDA**
- **New Carbon Credit Partnership Focused on ERW Activities**

Recent Verde AgriTech News

Nov 12, 2025 - Verde announced its Q3 2025 operational and financial results, with sales volume of 85,136 tons, which generated $5.9m in revenue during the quarter. Verde also delivered its first positive EBITDA after eight consecutive negative quarters, and the company is cautiously optimistic that this momentum will continue into 2026.



REPLAY **Q3 Earnings Webcast**

Q3 Earnings Presentation

Nov 17, 2025 - Verde announced the signing of an exclusive agreement with UNDO Carbon Ltd., a UK-based carbon dioxide (CO_2) removal innovator specializing in enhanced rock weathering, forming a collaborative framework to explore a commercial partnership focused on the creation, delivery, and sale of durable, high-quality carbon removal credits from our enhanced rock weathering (ERW) activities in Brazil and leveraging the potential of our glauconitic siltstone mineral.

This partnership has the potential to remove hundreds of thousands of tonnes of CO_2 from the atmosphere, establishing a clear framework for Verde to monetize ERW.

Understand Enhanced Rock Weathering (ERW)

ERW is a natural climate solution that speeds up the Earth's ability to absorb CO_2. It works by spreading finely crushed glauconitic rocks - in Verde's case - on farmland or open land. As the rocks interact with CO_2 in the air and soil, they capture CO_2 , where it can remain stored for thousands of years.

Hear what our CEO, Cristiano Veloso has to say

CLICK HERE!

Verde products have the potential to permanently remove carbon dioxide from the atmosphere through Enhanced Rock Weathering. The raw material used in our products are distinguished by their superior weathering properties compared to other options.

Combining the potential carbon removal and carbon emissions avoided by the use our products since the start of production, our total impact stands at over 306,000 tons of CO_2. From 2018 to Q3 2025 , the Company has sold 2.4 million tons of Product, which can remove up to 261,000 tons of CO_2. Additionally, this amount of Product could potentially prevent up to 68,000 tons of CO_2 emissions.

Impact potential from 2018 to 2025 YTD

Carbon avoided (Tons of CO_2)

67,985

Carbon removed (Tons of CO_2)

261,948
